
Handled explicitly

- negative-strand alleles
- variants spanning exon junctions
- 5′ partial models and split stop codons
- multiallelic and phased genotypes
- symbolic DEL / INS / DUP / INV
- overlapping edits with a fixed policy
- stop-codon loss and 3′ readthrough

Reported, not hidden

- REF mismatch (warning or --strict)
- unresolved or unsupported allele
- overlap_skipped
- partial 5′ / partial 3′ model
- no terminal stop (stop_lost)
- reference CDS / protein mismatch
- per-variant and aggregate effects
